

**Special Session on**

**“Advanced Control of Grid-Connected Inverters for Distributed Generation  
Systems”**

**Organized by**

- **Hadi Y. Kanaan,**  
Saint-Joseph University of Beirut, Lebanon  
email: [hadi.kanaan@usj.edu.lb](mailto:hadi.kanaan@usj.edu.lb)
- **Kamal Al-Haddad,**  
ETS, Montreal, Canada  
email: [kamal.al-haddad@etsmtl.ca](mailto:kamal.al-haddad@etsmtl.ca)
- **Mohammad Sharifzadeh,**  
ETS, Montreal, Canada  
email: [muhammad.sharifzade@gmail.com](mailto:muhammad.sharifzade@gmail.com)
- **Fadia Sebaaly,**  
Saint-Joseph University of Beirut, Lebanon  
email: [fadia\\_sebaaly@hotmail.com](mailto:fadia_sebaaly@hotmail.com)

**Call for Papers**

Renewable sources, such as photovoltaic panels, wind generators and fuel cells, are usually connected directly to the grid for cogeneration. This connection is made through power electronics interfaces that should ensure high stability, voltage regulation, power flow control, and low electromagnetic emission, along with high power density, low cost and high reliability. In some applications where high power level is required, the switching frequency of the power semiconductors is limited and the use of multilevel or interleaved converters becomes mandatory in order to get an acceptable power quality. This session addresses the issues of advanced control techniques applied to such converters to improve their performance, efficiency, reliability and cost-effectiveness.

**Topics of interest include, but are not limited to:**

- Advanced control of multilevel inverters
- Advanced control of power electronics in DC grids
- Grid-connectivity control requirements
- Control of paralleled or interleaved topologies
- Modeling and model-based control of switch-mode power converters
- Optimal control in hybrid cogeneration systems
- Predictive control of power converters
- Intelligent control of power converters
- Direct power control of power converters

## **The 46th Annual Conference of the IEEE Industrial Electronics Society**

**October 18-21, 2020, Marina Bay Sands Expo and Convention Centre  
Singapore**

- Power quality control in renewable energy systems
- New PWM techniques for power electronics control
- Real-time control and simulations of high power converters
